光帶設計導引進入科技公司的門廳，金黃間接的地毯與天花板光帶相互輝應大辦公區井然有序的排列，頭上顯現的是互相交叉的天花板設計風格，創新與速度感表現出跨足多重行業的意涵猶如萬馬奔騰的氣勢。地毯的造型編織也讓工作時數長的辦公場域多些輕鬆活潑的氛圍營造。

The light band design guides to the entrance hall of the technology company. The inter-phase golden and yellow carpet mutually reflects the orderly arrangement of the large office area with the light band of the ceiling. What appears on the head is the ceiling design style that crosses each other; innovation and speed sense show the meaning that cross-multiple industries is like the galloping momentum of ten thousand horses. The styling weaving of carpet also enables the office field with long working hours to build more relaxed and lively atmosphere.

大辦公區兩側分別為玻璃鐵件隔間的會議室與主管辦公室，在腦力激盪室，內為三面烤漆玻璃牆，立意就是隨性書寫，把不可能轉換成可能的方法或解決問題的手段，可在此做討論及激辯。

The conference room and the office of the director on both sides in a large office area is separated by the glass and ironware; in the brainstorming room, there're paint glass walls on three sides, meaning the idea is to write freely and turn the impossible into the possible way or the means to solve the problem for further discussion and debate.

有別於一般辦公室的規劃設計，此案的茶水間與休憩區相互結合，除飲料吧枱與冷飲冰箱另有無限供應五花八門的零食櫃。利用兩側靠牆採吧枱的設計，可以在此區放鬆同時也可在突發奇想時把IDEA隨手塗鴉在烤漆玻璃的白板上，中間則規劃不同造型的矮型坐式休閒椅，方便使用人數彈性的調整使用，創造另一種上班的趣味。

Different from the general office planning and design, the tea room and rest area in this case are combined with each other; in addition to the beverage counter and refrigerator, there is an endless supply of a variety of snacks cabinets. By using the area against the wall on both sides for a design as high as the counter, you can not only relax in this area at the same time, but also make graffiti of any IDEA upon a whim on the white board with paint glass, the middle of which is for the planning of different types of sitting -style low leisure chair, convenient for the use of flexible adjustment of the number of users, to create another kind fun at work.

另一個較貼心的設計為個人儲物櫃設計，每個人有一個小型儲物櫃，在儲物櫃牆設計了俄羅斯方塊的圖騰，由上往下慢慢落下，象徵了由下積沙成塔團結一致的概念，鮮艷的櫃體顏色與方塊造型，讓儲物櫃是另一種動腦的思維遊戲，在空間顏色、燈光、材質的搭配互動下，展現在此上班是幸福的。

Another more thoughtful design is for personal locker that everyone has a small locker with design of Tetris totem, slowly falling down from the top to symbolize the concept of solidarity as every a little makes a mickle. Bright color and square shape make the locker another kind of brainstorming game, showing working here is happy under the collocation and interaction of color, lighting and material in the space.
