

Soaring Light & Colors 光色飛翔

Lecture hall
for The Cosmetic Surgery Clinic

The project is to build a lecture hall for a cosmetic surgery clinic, offering a venue for local dermatologists and dermatologists in the Asian-Pacific region to conduct international research.

It is also a place for holding forums, and educational activities as well as offering accommodations. Thus, its space is defined as a place incorporates the features of exquisiteness of a top-quality guest house and professionalism of academic exchange. The calmness of dark woods is combined with the ever-changing light on the ceiling to fill this lecture hall for professional practices with liveliness.

With less decoration, light is used to create the many faces of the space to save energy and reduce carbon emissions. The color blue is heavily used to create depth and width. For example, the main wall at the entrance and the chairs in the lecture hall are as blue as the deep blue sea. Multilayers of blue create a sense of coziness in the space. The lecture hall has a capacity of 75 people, all facing toward the stage. The symmetric arrangement of chairs and the layered and stacked lines of its curtain and folding doors are designed to give a sense of order in the space.

The flowing lights on the ceiling change the atmospheres of the space. The colors of red, green, blue, purple and yellow represent different countries and connect these unique humanistic & cultural aspects. Lights shower the space as lines reveal intermittently, creating rich and colorful layers of lights. In the meantime, the reflective effects created by black mirrors, titanium and paint glass bring out a senses of modern technology while indicating the fact that the space is used for a cutting-edge industry: cosmetic surgery and its goal to head for an innovative future.

本案為醫美診所專設的演講廳，為來自亞太與本地皮膚科專業醫師設置的國際研究交流中心，兼具論壇、會館、教學的功能，因而，空間調性定義為結合頂級會所的精緻感與學術交流的專業感，以深色木質的沈穩與天花板光色的多變相互交融，讓專業場域的演講廳佈滿活躍氛圍。

減少裝飾材料，運用燈光讓空間本身即擁有多變的感受，以達節能減碳。大量使用藍色呈現深度與廣度的意象，如入口處主壁面與演講廳的椅子，如海洋般的藍，深邃多層次，營造自在舒適感。內部可容納 75 個座位，正對講台，對稱的座位安排，布幕與折門的層疊線條，以呈現空間肅靜的秩序感。

天花板以流動的燈光，幻化場域氛圍，紅綠藍紫黃色系，亦呈現多個國家的代表色，串連起異國人文景致。光色隨著線條間歇性地隱與現，層次繽紛，並運用黑鏡、鈦金屬與烤漆玻璃的折射效果，帶出科技感，回應空間作為一個前衛產業，以朝向創新的未來。

The project is to build a lecture hall for a cosmetic surgery clinic, offering a venue for local dermatologists and dermatologists in the Asian-Pacific region to conduct international research.

Lecture hall
for The Cosmetic Surgery Clinic

case data

Location: Kaohsiung City, Taiwan
Space form: Lecture hall of the cosmetic surgery clinic
Design scope: lecture hall, teaching center, guesthouse
Construction period: 6 months
Completion period: 108.05.20
Indoor Space: 100 square meters
Material: titanium, veneer, stone, wave dragon carpet, painted glass, special paint

地點：高雄市左營區
空間形式：醫美演講廳
設計範圍：演講廳、教學中心、招待所
施工期：6個月
完工期：108.05.20
室內坪數：100坪 = 330.58 平米
材質：鈦金、木皮、石材、波龍地毯、烤漆玻璃、特殊漆

Reduce the decorative materials, use the light to make the space itself have a variety of feelings, in order to achieve energy saving and carbon reduction.

減少裝飾材料，運用燈光讓空間本身即擁有多變的感受，以達節能減碳。
